

## How to back up file:

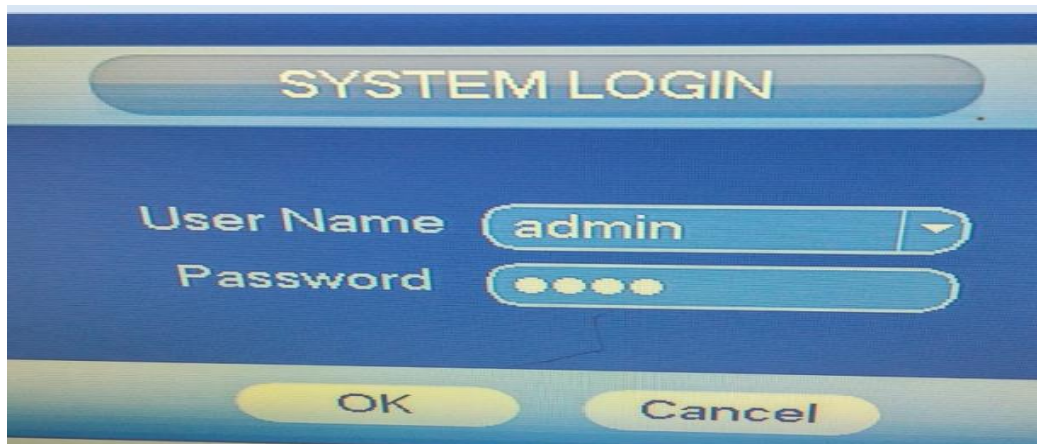

1- Put USB to front or the system

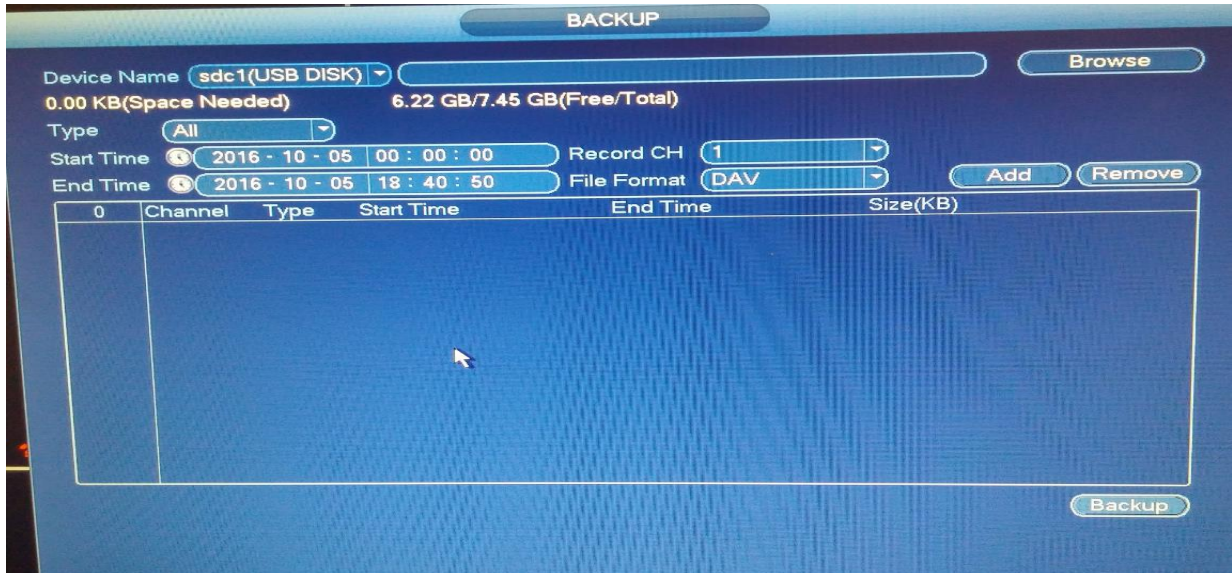

2-you will see the backup will be appearing. And then chose File **Backup**

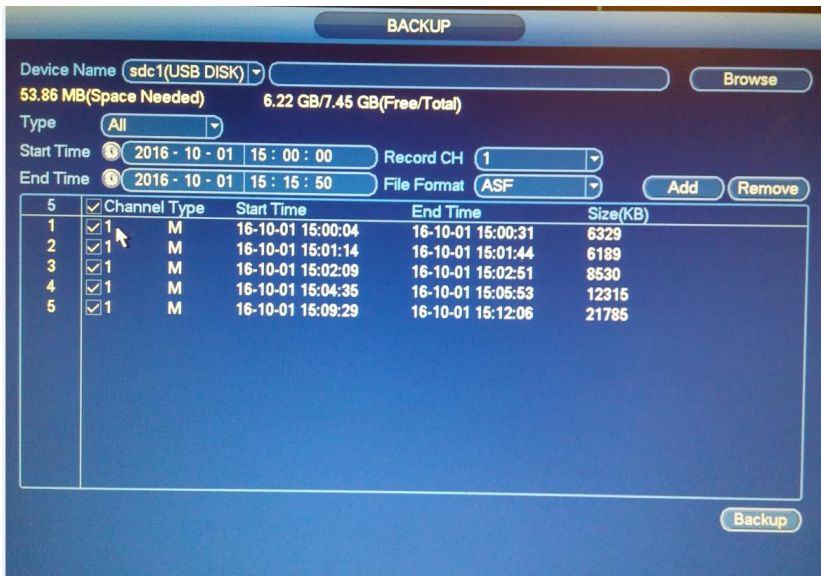

3-some times the system will ask for SYSTEM LOGIN user name and password which you have to do it.

4-Backup will be appearing and chose **Start** and **End** for **Date** and the **Time** and the **Record CH (Camera)** you want to have recording.

5- Also change file format to **ASF** and click Add to see the files.

6- Click on Backup you will see the recording.

7- After the recording is done take USB key out and you can play it in any PC

IF YOU HAVE ANY QUATION YOU CAN CALL ME.
